Examine Your Factory

Investigate your power problems. The difference between the horse-power that can be produced by the coal you buy and the horsepower you use on your machines is enormous. The loss in friction alone will amount to 30 per cent to 60 per cent.

Central Station Power Will Cut Your Costs

When you use Central Station Power, you pay only for the power actually used by your machinery—there is no waste. You avoid the problems of fuel purchase and storage, ask disposal, interest, taxes. depreciation, the ever-present danger of breakdown and all the other expensive vexations attendant upon private power plant operation.

> We will be glad to tell you what it will cost to operate your machines with Central Station Power.
